OBJECTIVE

A skilled IT professional with expertise in robotic process automation, generative AI, and UiPath's Agentic AI enabling autonomous, data-driven agents that set goals, make decisions, and adapt in dynamic environments. I seek a challenging role to apply my skills in designing cost-effective, intelligent automation solutions that drive organizational efficiency.

SUMMARY

- 1+ years of experience in the IT industry, specializing in robotic process automation (RPA) and recruitment. Skilled in process analysis and designing bots tailored for efficient automation.
- Actively involved in all phases of the Agile SDLC, covering analysis, design, development, testing, implementation, and maintenance, consistently delivering projects on time under tight deadlines.
- Extensive experience in diverse automations, including Excel, Web, Email, PDF, and Image/OCR Automation.
- Applied advanced UiPath automation techniques to streamline complex processes using features like Scraping, OCR engines, Recordings, UiExplorer, Selectors, queues, publishing, and provisioning.- In-depth knowledge of over 100 UiPath activities, and created numerous bots enhancing process flow, efficiency, and organizational reporting.
- Worked extensively with UiPath Studio and Orchestrator across various projects.
- Developed bots following Agile SDLC and RPA best practices, ensuring high-quality, user-friendly applications.
- Strong understanding and hands-on experience with the UiPath ReFramework.
- Leveraged UiPath for extensive automation of repetitive, manual processes.
- UiPath Certified Developer.
- Familiar with emerging Gen AI and Agentic AI technologies, including autonomous agents capable of data analysis, goal setting, and minimal-supervision action-taking—ready to apply these insights for future RPA innovations.

CORE COMPETENCIES:

Automation Tools:

- UiPath
- Power Automation

UiPath Skills:

- Excel Automation
- Web Automation
- E-mail Automation
- PDF Automation
- SAP Automation
- Image/OCR Automation
- Microsoft Outlook activities
- Terminal Activities
- DataBase Activities
- Ai Center Activities
- RE-Framework

Power Automate Skills:

- Flow Design and Development
- Triggers , Actions Connector Usage(SharePoint,Outlook, Teams, Excel)
- Approvals and Notifications
- Data Integration and Manipulation
- Error Handling and Debugging
- Expression Building and Formulas
- AI Builder Integration
- Power Automate Desktop (PAD)

Good Understanding Of:

- Python
- SQL
- Machine learning
- Gen Ai (LLM's)

ACADEMIC DETAILS

- **Bachelor Of Engineering** : Lords Institute of engineering and technology (OU) (2023)
- **Specialization: Information Technology**
- intermediate: Sri vijaya sai jr college(2019)
- SSC : Unique High School (2017)

EXPERIENCE

BIRLASOFT PVT LTD

(2023 - Present)

- Role & Responsibilities
- Understanding manual processes and designing bots to automate repetitive processes.
- Did development of front end and back-end bots to automate number of processes.
- Responsible for provisioning of those bots in UiPath orchestrator, organization wide and schedule them.
- Created flowchart and sequences according to UiPath best practices to create bots.
- Used large number of activities in different workflows to suffice automation requirements.
- Implemented different kinds of automations inside organization E.g. excel, pdf, word, web, desktop applications, reporting tools, data entry, database, email and etc.
- Identifying exceptions and its solution by testing each activity. Used debugging features present in UiPath Studio.
- Created different documents related to automation projects.

PROJECTS

(MASS USER TERMINATION - SAP)

- The objective was to Terminate the employee from an organization using RPA UiPath
- BOT will get the Input data from a file and perform the post Termination operations in SAP Instances
- Successfully covered the requirement elicitation and business understanding of the use case
- Successfully designed and developed end to end use case
- Successfully implemented RE Framework and developed reusable components
- Successfully handled business and system exceptions with proper maintenance of Audit Log

(RECORD LOCK/UNLOCK PROCESS – REMEDY, ORACLE JD-EDWARDS)

- The aim of this project is to automate the Lock/Unlock Process
- This enabled efficiency and speed in the Salesforce ticketing process.
- Successfully covered the requirement elicitation and business understanding of the use case
- Successfully designed and developed end to end use case with CoE team
- Successfully implemented RE Framework and developed reusable components
- Successfully handled business and system exceptions with proper maintenance of Audit Log

- Note -Did more than 10 projects.Above are the last two projects I worked on.

CERTIFICATION

- Got UiPath certified.
- nVDIA Generative AI Explained
- Cognizant Artificial Intelligence Job Simulation on Forage

MISCELLANEOUS INITIATIVES & PROJECTS

- Youtube Video Explanation Regarding LLM's and GenAi
- Machine learning approach for opinion mining online customer reviews
- Spammer Detection and Fake user Identification on Social Networks

PERSONAL PROFILE

- Place Of Birth : Nizamabad (503180)
- Languages Known :English, Hindi, telugu
- PassPort NO:X7156387 , Valid Upto:12/03/2033
- Current Address: Vijayanagar Colony , Hyderabad (500057)
- Contact:+91-7794820313, shaikabuaahmed@outlook.com

DECLARATION

- I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned.
